REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Gasser et al U.S. Pat. No. 5,224,163 discloses a method/system for delegating authorization from one entity in a distributed computing system to another for a computing session.

JP2002222251A Motoda, Toshihiro et al discloses an authority delegating type service executing system not needing a confidential relationship between an intermediary system and a server system by providing a processing authority committed to the intermediary system from a user.

However, neither Gasser nor Motoda singularly or in combination discloses the recited feature:

As per claims 1 and 23 "receive an access requirement for accessing the service, the access requirement being received from a relying party that provides the service, determine if the delegation credential is valid for the access requirement, wherein determining if the delegation credential is valid comprises providing the delegation credential to a verification service that compares the delegation credential to pre-existing delegation credentials that correspond to the access requirement, and enable access to the service if the delegation credential comprises a valid delegation credential for the delegate".

As per claims 11 and 29 "receiving from the delegate, an indication corresponding to a selected delegation credential, sending the selected delegation credential to a verification service that compares the selected delegation credential to permissible

Art Unit: 3621

delegation credentials for the delegate, using the selected delegation credential to access the service if the selected delegation credential comprises a permissible delegation credential for the delegate".
